

Shutter & Shade

The complete room darkening solution

If window light gets in the way of sound sleep, then the Shutter & Shade range from S:CRAFT could be your new best friend. Ideal for shift-workers, or children who need to sleep during the day, these blinds block out virtually all external light. Simply close your eyes and drift off into dreamland for a perfect, restful sleep.

Traditional 'black-out' blinds often let light seep in around the edges. The Shutter & Shade range is different. The blinds are housed snugly in recessed channels behind the shutters, so almost all external light bleed is eliminated... great news for daytime sleepers, and even movie buffs eager to re-create a cinema-like ambience.

The Shutter & Shade system:

Integrated with S:CRAFT shutters

Lightweight, single honeycomb cell construction

Child safe consolidator fitted as standard

Blind fits snugly in a recessed channel

About Shutter & Shade:

- Available for Antigua, Fiji and Sumatra shutters
- Superior light reduction over curtains and blinds
- More insulating than just either shutters or honeycomb blinds by themselves
- Perfect for bedrooms, nurseries or home cinema setups and media rooms

Optional extras...

- ✓ Custom colour – shutters in the colour to suit your home
- ✓ A hygienic coating which kills 99.9% of germs
- ✓ Silent tilt rod – hidden mechanism for operating the louvres

15 room darkening blind colours to choose from:
